## "European Synapse Summer School"

### "Development and plasticity of synaptic transmission : from receptors to behaviour"

**The European Synapse Summer School -EScube- at a glance**

The school combines lectures by renowned scientists with methodological training. Methodological and goal-oriented trainings are achieved by guiding the students through hands-on experiments within the frame of short scientific projects.

**Topics include**

- Cellular and molecular biology of synaptic proteins;
- Morphology and anatomy;
- Cellular electrophysiology;
- Live imaging techniques;
- Integrative approaches;

**External Speakers**

- Amparo Acker-Palmer, David Bannerman, Jean-Louis Bessereau
- Bernard Bettler, Roberto Caminiti, Stephanie Cragg
- Monica DiLuca, André Fischer, Viviana Gradinaru
